

Liberalismo e democrazia - Liberalism: a set of political and economic principles based on an individualistic idea of the society; democracy: government based on popular participation, on the principles of social solidarity. Two models of freedom, that history has led, despite the distinction of the respective driving forces, to a mutual integration and to triumph over all other systems and the forces of the modern world.

Giuseppe Galasso - Historian, journalist, politician, Professor emeritus at the University of Naples Federico II. For Salerno Editrice directs the series «Profili» and «Biblioteca storica».

pp. 100 - € 8,90

New books by great authors of our time, on subjects, figures, moments and aspects of the culture and history
